

Inlaid Preformed Thermoplastic Crosswalks and Traffic Calming Surfaces for Asphalt

DuraTherm® is a specially-designed preformed thermoplastic material that is inlaid into an imprinted asphalt surface and thermally bonded using specialized infrared heaters. Engineered to lie slightly below the asphalt surface, Dura-Therm® is protected from wear, ensuring effective service life while maintaining its attractive contemporary look for years. Not only do these streetscape enhancements provide aesthetic appeal that communities and property owners desire, safety for shared roadway users is also enhanced and regulatory requirements are not compromised.

PERFORMANCE-BASED FEATURES AND BENEFITS

- High skid/slip resistant for safety. As material wears, new anti-skid elements are exposed.
- 90-mil "grout lines" inlaid to sit slightly below the surface
- Enhanced durability provides optimum wear in adverse conditions; Snowplow friendly
- · ADA compliant Pedestrian and wheelchair friendly surface
- Low maintenance
- Design flexibility with standard and customizable colors and patterns
- Eliminates the maintenance and safety concerns of loose pavers
- All preformed thermoplastic materials are made at Ennis-Flint's manufacturing facility which is ISO 9001:2008 certified for design, development and manufacturing of preformed thermoplastic. Quality, value and long-term performance are built into the marking. Anti-skid elements are added at time of manufacturing for optimized application at the jobsite.

DuraTherm® is installed by a network of Certified Applicators so you can be confident that your design intentions will translate to fully-met expectations on the job site. A specialized pavement heater softens the existing asphalt. Templates are pressed into the surface to create the imprinted pattern. Pre-cut sections of DuraTherm® are set into these impressions. The specialized heater is used again to bond the material to the asphalt surface.

STANDARD PATTERNS Custom patterns are available requiring a minimum purchase.

Surface Systems for Enhanced Safety

CROSSWALKS • MEDIANS • ISLANDS • ROUNDABOUTS • ENTRYWAYS • LOGOS

TrafficScapes[™] is a portfolio of preformed thermoplastic pavement marking materials engineered for durability, safety, and aesthetics for the streetscape and traffic calming market designed to:

- Improve traffic safety especially at intersections and multi-use paths
- Enhance visibility for pedestrians, motorists, and cyclists
- Provide design elements that complement a Complete Streets community
- Channel pedestrians across busy commercial parking areas
- Promote and/or revitalize community image
- Attract new business development in livable communities
- Create low-cost median or island effect without the use of raised curbs

Each product offers its own unique application and performance approach to streetscape projects where shared roadway safety and aesthetic appeal need to work in conjunction.

When used on public roadways and private properties open to public travel, decorative crosswalks require proper demarcation with white linear boundaries according to the Manual on Uniform Traffic Control Devices (MUTCD).
